

The diagram shows a simplified chassis layout. A battery symbol is located on the left side, with a thick black arrow pointing to the right, representing the main power rail. A red line, representing the Cat7 network cable, enters from the bottom left and connects to the positive terminal of the battery. Labels in German identify the components: '+ Stromversorgung' (Power supply), '- 24 VDC', and 'Netzwerkkabel Cat7'. On the right side, a red line represents the power supply for the vehicle's lighting system, labeled 'Stromversorgung Fahrleitungsspannung 750 VDC'. At the bottom right, a red line represents the rubber hose connection, labeled 'Gummischlauchleitung NSGAFÖU 1x10'.
